RIGHTS  
ON THE MOVE

Children of same-gender parents suffer discrimination when their relationship is not recognized by the law of the State they live in or of a destination country if they move. Limits to adoption hamper their well-being. This workshop will analyse international and comparative sources that support full recognition of family ties.

***Rights on the move*** looks at the European protection of the rights of rainbow families, i.e. families where the parental roles are played by persons of the same legal gender - moving and residing within the EU.

By adopting a child-oriented approach, *Rights on the move* aims at unravelling how freedom of movement should be read in compliance with the EU Charter, the European citizenship rights of the child and other international and supranational instruments.

The project started in January 2013 and will last two years.

The project "Rights on the move-Rainbow families in Europe" is co-funded by the European Union-Fundamental Rights and Citizenship Programme. The project is coordinated by the Faculty of Law-University of Trento.
